**Kraft** ...keeps your horses fit!

Everything revolves around horses for us. Everything we do is focused on their well-being and care. Horses love exercising and need a place to rest. We bring both together. We have been experts in equestrian exercise worldwide for decades. Customers often asked us about horse stalls and associated stable equipment. With the addition of our top-quality range of horse stalls, we will offer "one stop shopping" where it is desired. The larger product range enables the implementation of larger overall projects.

Exercise and rest are now combined. Look at our stalls in this catalog.

From the simple horse stall to the finished barn with gates and windows. Our product range includes everything needed for stables, including outdoor stalls and paddocks. Smart and sophisticated solutions made with high quality workmanship - we design stalls with the same passion that drives us with our exercise equipment.

For more than 20 years, more than 1500 customers from all over the world have placed their trust in us.

Our family-run company's projects all revolve around the horse. A very high standard of quality and safety guides our metal fabrication company. We have a powerful team that is available from the initial request to planning, implementation and the completion of your project. We follow through at every stage of your project, large or small, and are always available. This also applies to the future.

Trust in us and talk to us about your wishes and ideas. Our focus is your horses' satisfaction!

# KRAFT Horse Stalls

STANDARD

*Standard*

**Height:** 2,200mm  
**Steel spindles:** Ø 22 mm, gap: 60mm

**Frame Profile:** C-Profile

**Wood height:** 1,240mm

**A horse stall with an excellent price-performance ratio for everyday needs.** Standard front walls with sliding doors, dividing walls and, if required, rear walls. It is easy to plan and design stable stalls quickly and easily.

All doors can be opened from inside and outside. A hinged opening can be installed into the door as an option.

The KRAFT cleaning system can be combined with the Standard stalls to ease the work load.

Standard stall front with sliding door including window.

*Uncomplicated and solid!*

Standard stall front between masonry walls.

→ See table on page 24 for details.

# KRAFT Horse Stalls

PROFESSIONAL

*Professional*

**Height:** 2,300mm  
**Steel spindles:** Ø 28 mm, gap: 53mm

**Frame profile:** double-walled C-profile

**Wood height:** 1,285mm

**Individual sizes and dimensions on request.**

**This horse stall offers a high level of safety, stability and durability.** With extra strong planks, embedded in a double-walled frame profile and a height of 2.30 m, this horse stall is reinforced in every detail. The steel tube spindles are completely embedded in the frame and the gap between the steel spindles is reduced.

The easy operation of the sliding door is due to double pairs of casters above and additional guide-casters below. Various extras such as vents between the planks, ornamental posts with a special surface, various cover caps, rings, etc. are available.

The KRAFT cleaning system can also be included.

The track spans the entire width of the stall with the Professional horse stall.

The quality difference lies in the detail and what's hidden inside - profile, profile strength, dimensions.

*Strong, durable and safe!*

→ See table on page 24 for details.

**Hot-dip galvanization optimally protects against corrosion.**

All KRAFT products are completely submerged at about 450 ° C and completely coated inside and out.

NEN-EN-ISO 1461

All powder-coated stalls are first hot-dip galvanized.

# Front, partition and rear walls

## DESIGN EXAMPLES

### FRONT WALLS

- With sliding door
- Sliding door with integrated window
- Casters with ball bearings glide in a solid closed track
- Spring loaded lock
- Sturdy construction: welded sealed frames
- All steel parts are hot-dip galvanized
- **Also available with a hinged door**

Many extras are possible, e.g. fixed spindles, hinged opening in sliding door, powder coating and more.

Sometimes custom work is necessary, and it is easier to fit the stall into a building rather than vice versa. **We are happy to discuss individual solutions with you.**

### PARTITION AND REAR WALLS

Usually partition walls are used to complete a stall, but sometimes a rear wall is needed:

- **Boards below – framed spindles above** (optional screen in the feed area)
- **Boards below and above** (optional spindle window grid)
- All steel parts hot-dip galvanized

Partition walls, boards below and above with spindle window grid

Professional stall system, front panels with sliding doors and head opening

→ See table on page 24 for technical details.

Professional front walls between masonry walls, with sliding door and head opening

### BOARDS:

#### Govaplast solid plastic

- Tongue and groove
- Brown or black (other colors on request)
- Shockproof and safe

#### Okan hardwood

- Tongue and groove, beveled edges
- Robust, optically beautiful and natural material
- Pre-dried

#### Bamboo

- Tongue and groove, beveled edges
- Strong, resistant to kicks, especially durable
- Oiled

**S1 + P1: 28 mm thick | S2 + P2: 38 mm thick**

# Feeding panels

## TECHNICAL DETAILS

*... safe feeding with lots of space for your horses*

### OPEN

- From the floor to 500 mm height with boards
- Steel spindles above with about 300 mm gap
- Steel is hot-dip galvanized

Feeding panels ease feeding and save time.

→ See table on page 24 for technical details.

### HALF CLOSED

- Like open panel, but every second opening is closed with steel spindles or boards

### OPTIONAL

#### Front wall panel with sliding or hinged door

- As normal stall door (up to 1,240 mm / 1,285 mm boards, spindles above)
- As feeding panel design (up to 500 mm boards, open spindles or half closed above)

Open feeding panel

Feeding panels of an open stable – simplify feeding and provide the horses with fresh air and welcome distractions

Feeding panel with raised rail and telescopic partition walls

# Cleaning System

## FRONT WALLS

*time-saving*

A sophisticated system has been developed to match the Standard and Professional stalls.

### One-piece hinged front wall (sliding door)

The front wall with sliding door can be opened. The complete wall opens almost 180 degrees into the aisle – the stall is then machine-accessible.

*... simplifies everyday life in your stables.*

# Cleaning System

## PARTITION WALLS

*saves your strength*

### Extendible partitions

The extracted partition wall is pulled into the stable aisle. This creates a stall that can be used during muck removal. Whole rows can be cleaned with mechanical equipment.

### Two-piece hinged front wall (hinged door)

This system is used for front walls with hinged doors. In addition to the hinged door, the fixed part of the front wall can be rotated. Both parts open 180 degrees, so that this stall is easily accessible.

### Hinged partitions

The partition wall is rotated 90 degrees to the rear wall. The stalls can be enlarged for other uses such as for foaling or raising foals in addition to allowing mechanical muck removal of whole rows.

# KRAFT Designer Horse Stalls

HOHENLOHE SERIES

*Be one of a kind!*

KRAFT Designer Horse Stalls · HOHENLOHE SERIES

## SANDBERG

*rolling wave*

10

*KRAFT Designer Horse Stalls Hohenlohe – high-quality stable equipment and a feast for the eyes – here, for example, high quality EICHELGARTEN with round door posts*

**Elegant stalls, timeless or modern – combined with elegant design. There are many combination options which can be individualized.**

In keeping with traditional stables of a bygone era, the KRAFT Designer Horse Stalls are furnished with noble ornamental posts, beautiful door fittings and decorative elements that fit today's spirit. True eye candy.

High-quality material and excellent workmanship leave a lasting impression. Different models can be combined by request. Labor reducing cleaning systems can be used here as well. KRAFT Designer Horse Stalls are manufactured upon order and are available in all RAL colors.

**KRAFT Designer Horse Stalls are available in high or low versions.** The walls can be erected in a straight line or in a so-called V-line. Two panels are installed diagonally at an angle. The shape is determined by the space available.

(For dimensions and sketches see cover, page 23)

11

*SANDBERG captivates with its wave*

The wavy lines of SANDBERG model give the horse stall a lively and light look. The low version of the SANDBERG model creates an open feel when stalls are joined, and one walks along the stable aisles.

The noble workmanship with its round door posts combined with elaborate practical details nicely fit into a modern horse stable.

*SANDBERG, in the high version, creates an arch at the stall door.*

# RIEDWASEN

*classic*

RIEDWASEN integrated into a wooden girder construction

Dutch doors

Horse heads or round end caps on round door posts and vaulted arches create a classic and elegant appearance.

RIEDWASEN is inspired by the historic stalls of days gone by. It can be combined well with brick masonry walls. The stall door can be equipped with a V-cutout upon request. Divided stall doors (Dutch doors) allow the top to be opened fully.

Individual accents create a unique charm

Different applications of RIEDWASEN

# PARADISE

*elegant*

The walls can be erected in a straight line or in the so-called V-line. Here, the two panels are installed diagonally at an angle which results in a useable niche.

**Like no other designer stall, our PARADISE horse stall impresses with its versatility and variability.**

Attractive for the eye are the horizontal trim ends with steel spindles or boards. With the high version of PARADISE, the upper part of the stall door can be made with a two-part grid that can be opened like a window. The horses can easily observe the happenings in the stable aisles and are relaxed.

Stall door with two-part window

PARADISE low version offers horses sufficient social contact

# EICHELGARTEN

*modern*

The designer horse stall EICHELGARTEN looks modern and simple. The front is divided into three parts in the low version. The straight door in the middle with slightly curved panels on the sides.

An arch is above the door in the high version. The round door posts stand out. There are many design possibilities in the V-style setup.

*The top of the door can be opened to offer more social contact*

*EICHELGARTEN in the high version*

*EICHELGARTEN in the low version with V-style setup*

# SCHIMMELHOF

*straight lines*

SCHIMMELHOF is characterized by a simple and straightforward design.

Characteristic are the heavy square door posts and a V-like cutout in the front wall with the low version. The partition walls can be also be designed with V-cutout. All door fittings are made of stainless steel.

*Social contact is increased thanks to the V-cutout in the partition walls*

*SCHIMMELHOF – enlarging the stall is no problem – every other wall can be opened.*

# Windows and doors for stables

## INTRODUCTION AND TYPES OF CONSTRUCTION

Designed for a long life with horse-friendly aspects, KRAFT stable windows and doors are a valuable investment for your barn. KRAFT supplies carefully crafted windows, hatches, doors and gates for existing as well as new horse stables.

**Doors and windows shape the overall design of the exterior and must work flawlessly for many years.**

The construction requires expertise and knowledge to harmonize with the behavior of horses. We supply hinged or sliding components also custom made upon request.

Exterior windows and doors	Exterior Window Standard	Exterior Door Standard	Exterior Window Professional	Exterior Door Professional

# Windows and doors for stables

## EXTERIOR WINDOWS AND STALL ENTRANCE DOORS

### CHARACTERISTICS

- High quality, made of steel, hot-dip galvanized, wood inserts; hot-dip galvanized bite guard on the inside
- Optional safety glass framed with steel spindles
- Adjustable hinges, various locks
- Turn-tilt system available
- Optional arched and diamond designs
- Water drainage channel
- Many options, e.g. magnetic locks on the wall, powder coating according to RAL colors and more.

Professional window with wooden planks on the outside and bite guard on the inside

Stable entrance door with arch and matching windows

Turn-tilt system with additional protective steel spindles (galvanized), frame powder-coated, additional rungs as decorative element

Stable front with Standard entrance door and turn-tilt windows that provide sufficient ventilation and light

Stable entrance doors are equipped with a door latch set, a latch lock and a cylinder lock.

Complete door lock set

Adjustable hinges made of stainless steel

# Windows and doors for stables

## DOUBLE DOORS AND STALL DOORS

All doors can be delivered rectangular or with an arch. Large double doors are available as vertically split double doors including a stall entrance door.

Stall doors with tread and bite guards on the inside and V-grid insert in the upper part

A beautiful stable front with hinged door as an integrated stable entrance door with diamond-shaped glass inserts

Split Dutch stall doors usually serve as an outlet to the paddock or pasture – they are wide enough for your horse to pass through. They also offer the quality and benefits of an exterior window. Flat locks built into the door can be operated from inside and outside, and a cylinder lock can also be installed in the upper part.

Flat built-in lock

Magnetic catch for top of doors and shutters

Stall doors with turn-tilt system

Stall doors as passage to the paddock

# Windows and doors for stables

## SLIDING DOORS

Sliding doors are **convenient**, easy to use and safe. There are single or double doors that come complete with top guide rail and bottom casters.

Sliding door as stall entrance door behind arched masonry, combined with matching windows

Custom made double sliding door which slides into a wall cavity. A particularly beautiful visual effect is created by the rounded brick arch.

Sliding doors between stable and riding hall

Vertically divided double sliding door with cover strip over guide rail

# Exterior Stables

WITH SHED OR GABLE ROOF

*modular*

Rest and good care are very important for your horses. To accomplish this, you need protective accommodations with sufficient light and space. Our outdoor stables offer just that along with solid construction and variability in width and length. They are also

completely removable. Whether shed or gable roof, for smaller stables or larger units, with different roof coverings – we are flexible. Double rows of stalls are no problem under a gable roof.

## Shed roof

- Inexpensive and easy to install
- External walls 2,300 mm high
- Roof overhang approximately 1,250 mm
- Well suited for expansion

## Gable roof 12°

- External walls 2,300 mm high
- Roof overhang with wood paneling approximately 1,140 mm

## Gable roof large 25°

- External walls 2,300 mm high
- Roof overhang with wood paneling approximately 1,585 mm
- High ridge, wide roof structure
- High air circulation for stalls
- Solid and meticulous construction
- Additional options possible, e.g. heavy doors, roof ridge with translucent ventilation panels
- Roofing available in several colors

→ For technical details see table on page 24

*Outdoor stable with shed roof – simple yet attractive*

*... flexible and expandable*

*Exterior stables with 12° gable roof, interior stalls and aisle*

*The wood-covered soffit is standard with these beautiful outdoor stables with gable roofs.*

# Exterior Stables

WITH SHED OR GABLE ROOF

*... easy to assemble*

*Exterior stables with large gable roof, custom colors and recessed lighting in the soffit.*

**Outdoor stables are available with single rows, double rows back to back as well as double rows with aisle.**

Stable size and equipment are tailored to your needs. Different materials can be chosen for the roof. Additional options include roof drainage, light ridge, lighting and more.

*Light-flooded stable aisle with large sliding gates*

*"American Barn" – complete stables with a large gable roof and a double row of stalls*

# Accessories

## GROOMING STALL, EXAMINATION STALL, PADDOCK

### GROOMING STALLS

#### Caring, cleaning, saddling ...

Grooming areas are designed with various hitches and dividing walls. The wet area can be equipped with a swivel arm and hose.

### EXAMINATION STALL

... ensures a safe examination of your horse by the veterinarian. It is adjustable. There are several models to choose from, e.g. for mare with foal (see picture).

### PADDOCK

A paddock provides fresh air, daylight and additional space as an outlet from the stables. They are carefully built to prevent injury.

- Equipped with two or three horizontal round tubes
- Corner post, square 90 x 90 mm or round Ø 133 mm
- Doors and gates with adjustable hinges and latches
- Steel parts are hot-dip galvanized, optionally powder-coated

Paddocks enlarge the stall and provide additional space for exercise.

**When planning, consider that the accessories should be sufficient for your stables.**

Cleaning and grooming areas as well as washing stations and examination stalls are indispensable.
